

SAYED AHMED ELMAHDY

.NET Backend Developer

✉ sayed.work223@gmail.com ☎ +201093307397 🌐 in/sayed-elmahdy365 🏠 [GitHub](#)

SUMMARY

A .NET Developer with 2 years of experience in backend web development, focused on solving complex problems and writing clean, efficient code. Skilled in building scalable systems and improving performance across platforms. Known for a collaborative approach and eagerness to take on new challenges, always looking to contribute to impactful projects and deliver high-quality solutions.

EXPERIENCE

.Net developer | Z4U | Full-time (Remotely)

April 2024 - Present

- Spearheaded the development of comprehensive ERP systems, reducing system downtime by 15% through backend architecture optimizations.
- Enhanced company operations and workflow efficiency by improving system reliability and scalability.
- Developed robust backend solutions for e-commerce platforms, improving performance, scalability, and supporting high traffic loads.

Project Leader | Art of Coding | Freelance

July 2023 - Present

- Led a team of developers at a freelance company providing diverse software solutions across various platforms including frontend, backend, and mobile applications, completing 100% of projects on time.
- Pioneered the development of a sophisticated Student Management System, enhancing educational administration and student engagement.
- Directed the backend development of a web application, reducing user query response times by 25% through optimized code and database management.

PROJECTS

Electronic Mind of Alzheimer Patient | Graduation Project | [GitHub Repository Link](#)

October 2023 – July 2024

- Developed secure RESTful APIs and implemented robust user authentication systems with ASP.NET Core Identity and JWT for a healthcare application.
- Engineered real-time communication features using SignalR for patient tracking, scheduling, and reminders, integrating with flutter mobile app.

Technologies Used: ASP.NET Core, Web socket (SignalR), JWT, SQL Server, Entity Framework.

Luka- Ecommerce | Z4U Company Project | [Website Demo Link](#)

April 2024 - July 2024

- Optimized backend functionalities by implementing caching and query optimization, resulting in a 45% increase in system performance and a 30% improvement in availability, while significantly reducing server load.
- Integrated a robust ERP system that enhanced business operations and provided a seamless user experience.

Technologies Used: ASP.NET Web API, SQL Server, JWT, Web socket (SignalR), Distributed Cache (Redis), Entity Framework.

EDUCATION

Bachelor of Computer Science

El Shorouk Academy • Egypt • 2024 • 3.5

INVOLVEMENT

GDSC El Shorouk Academy

• Programming Language Mentor

October 2022 - June 2023

CPC El Shorouk Academy

• Problem-Solving Mentor

October 2021 - October 2022

SKILLS

- **Languages & Frameworks:** C#, JAVA SCRIPT, HTML, ASP.NET Core (Routing, Middlewares, Filters, Controllers), Blazor.
- **Backend & APIs:** Entity Framework (ORM), Dapper (ORM), RabbitMQ, SignalR, WebSockets, Microservices (Basic), Redis (Caching).
- **Databases:** Microsoft SQL, MySQL. • **Authentication:** JWT, OAuth.
- **Cloud & Containerization:** Microsoft Azure, Docker.
- **Tools & Version Control:** Git, GitHub, Serilog (Logging & Monitoring), Swagger, Postman.
- **Concepts & Methodologies:** OOP, Clean code, Clean Architecture, SDLC, Design Patterns, Data Structures, Algorithms.
